EMPLOYMENT EXPERIENCE

Intern at Enerpact • Helped convert their codebase from Java to Python. Solved “forecast curves” using linear regression. Reduced deviations in the generated data through several programs to make the process 75% more efficient and increase revenue by 13%.	May 2022-July 2022
Academic Intern at the UC Berkeley • Assisted students, as part of course staff for Computational Structures in Data Science, in learning topics like Trees, Linked List, loops, and recursion in Python.	August 2022-December 2022
Tutor at GoPeer • Tutored struggling High school and Middle school students in Math; observed their learning patterns and provided custom tailored sessions for each student. Attained enhanced grades for all students under my tutelage within a two-month timeframe.	January 2023-March 2023
